

API Endpoint Documentation: /api/v1/product-offering/certificate

Overview

This endpoint allows automated product certification creation through Machine-to-Machine (M2M) communication. It is used to request compliance certifications for digital products or services.

Endpoint URL

```
POST /api/v1/product-offering/certificate
```

Authentication

Authentication Type: Bearer Token (M2M)

```
Authorization: Bearer <m2m_token>
```

- **Description:** The endpoint accepts Machine-to-Machine (M2M) tokens issued by the DOME Marketplace verifier
- **Authorized issuer:** `verifier.dome-marketplace`
- **Validation:** The token is automatically validated by the M2M filter before processing the request

Request Structure

Content-Type

```
Content-Type: multipart/form-data
```

Required Parameters

All fields are sent as `@RequestPart` in multipart format:

Field	Type	Required	Description
<code>product_specification_id</code>	String	✓	Unique identifier for the product specification
<code>service_name</code>	String	✓	Name of the service to be certified
<code>service_version</code>	String	✓	Service version

Field	Type	Required	Description
<code>organization_name</code>	String	✓	Name of the requesting organization
<code>organization_address</code>	String	✓	Complete address of the organization
<code>organization_country</code>	String	✓	ISO country code (format: XX)
<code>organization_email</code>	String	✓	Organization contact email (valid format)
<code>organization_url</code>	String	✓	Organization website/URL
<code>organization_vat_id</code>	String	✓	Tax identification number (VAT ID)
<code>requested_compliance_level</code>	String	✓	Requested compliance level (only accepts: "Baseline")
<code>files</code>	List<MultipartFile>	✓	Compliance documentation files

Field Validations

- **service_name**: Cannot be empty
- **service_version**: Cannot be empty
- **organization_name**: Cannot be empty
- **organization_address**: Cannot be empty
- **organization_country**: Valid 2-character ISO code (e.g., "ES", "FR")
- **organization_email**: Valid email format
- **organization_url**: Valid URL
- **organization_vat_id**: Cannot be empty
- **requested_compliance_level**: Currently only accepts "Baseline"
- **files**: List of files in multipart format (PDF documents, images, etc.)

Responses

Success Response (201 Created)

```
{
  "statusCode": 201,
  "message": null,
  "data": null
}
```

Error Responses

Validation Error (400 Bad Request)

```
{
  "statusCode": 400,
  "message": "Validation error: [field] [error description]",
  "data": null
}
```

Authentication Error (401 Unauthorized)

```
{
  "statusCode": 401,
  "message": "Unauthorized - Invalid M2M token",
  "data": null
}
```

File Processing Error (500 Internal Server Error)

```
{
  "statusCode": 500,
  "message": null,
  "data": null
}
```

Internal Server Error (500 Internal Server Error)

```
{
  "statusCode": 500,
  "message": "Unexpected error",
  "data": null
}
```

HTTP Status Codes

Code	Description
201	Created - Certification created successfully
400	Bad Request - Validation error in submitted data
401	Unauthorized - Invalid or missing M2M token

Code	Description
500	Internal Server Error - Internal server error

Request Example

cURL

```
curl -X POST "https://dome-certification.dome-marketplace-sbx.org/api/v1/product-offering/certificate" \  
-H "Authorization: Bearer eyJhbGciOiJSUzI1NiIsInR5cCI6IkpXVCJ9..." \  
-F "product_specification_id=PROD-2024-001" \  
-F "service_name=Payment Gateway API" \  
-F "service_version=2.1" \  
-F "organization_name=TechCorp Solutions" \  
-F "organization_address=Calle Mayor 123, 28001 Madrid" \  
-F "organization_country=ES" \  
-F "organization_email=compliance@techcorp.com" \  
-F "organization_url=https://www.techcorp.com" \  
-F "organization_vat_id=ESA12345678" \  
-F "requested_compliance_level=Baseline" \  
-F "files=@compliance_document.pdf" \  
-F "files=@technical_specification.pdf"
```

JavaScript (Fetch)

```
const formData = new FormData();  
formData.append("product_specification_id", "PROD-2024-001");  
formData.append("service_name", "Payment Gateway API");  
formData.append("service_version", "2.1");  
formData.append("organization_name", "TechCorp Solutions");  
formData.append("organization_address", "Calle Mayor 123, 28001 Madrid");  
formData.append("organization_country", "ES");  
formData.append("organization_email", "compliance@techcorp.com");  
formData.append("organization_url", "https://www.techcorp.com");  
formData.append("organization_vat_id", "ESA12345678");  
formData.append("requested_compliance_level", "Baseline");  
formData.append("files", fileInput1.files[0]);  
formData.append("files", fileInput2.files[0]);  
  
fetch(  
  "https://dome-certification.dome-marketplace-sbx.org/api/v1/product-offering/certificate",  
  {  
    method: "POST",  
    headers: {  
      Authorization: "Bearer eyJhbGciOiJSUzI1NiIsInR5cCI6IkpXVCJ9...",  
    },  
    body: formData,  
  })
```

```
}  
)  
.then((response) => response.json())  
.then((data) => console.log(data))  
.catch((error) => console.error("Error:", error));
```

Additional Functionality

Email Notification

- Once the certification is successfully created, an automatic notification email is sent
- The email is sent to the address specified in `organization_email`
- The email subject includes the service name and version
- The "email-in_progress" template is used to indicate that the certification is in progress

File Processing

- Submitted files are processed and securely stored
- Multiple files are supported in a single request
- Files are associated with the created certification process

Traceability

- All requests are logged for audit purposes
- The authentication type used is identified (M2M vs user JWT)
- Detailed errors are logged to facilitate debugging

Important Notes

1. **M2M Only:** This endpoint is specifically designed for Machine-to-Machine communication
2. **Asynchronous:** Certification creation is an asynchronous process; a 201 response indicates it has started successfully
3. **Required files:** It is mandatory to send at least one documentation file
4. **Uniqueness:** The `product_specification_id` must be unique per organization and version
5. **Country format:** The country code must follow the ISO 3166-1 alpha-2 standard
